About me

Edit

Bonjour! I am Tomas, a Lead UX Designer here at Tri Inc. Born and raised in France, I moved abroad to pursue my passion for human-centered digital products. Over the past 4 years at this company, I've had the privilege of shaping our core application interfaces, building unified design systems, and conducting user research to make our platform as intuitive as possible.

I specialize in wireframing interactive dashboards, asynchronous flow design, and cross-department collaboration. Whether you need a quick UI critique, want to map out complex screen transitions, or just want to chat about design systems over coffee, feel free to reach out!

Ongoing Projects

- Archive UI Redesign v3.0
- Cross-Department Collaboration Portal
- Development of Good Recipe

Contributed Projects

- Enterprise Global Identity System (2025)
- Automated Skill-Mapping Analytics Tool (2024)
- Mobile App UI Kit Foundation (2023)
- Corporate "Peer Feedback" Wall Architecture (2023)
- Interactive Skill Assessment Onboarding (2023)

Context: Collaborative work on the Asynchronous Directory Filtering System.

Hey Tomas, thanks for the quick turnaround on the wireframes for the new dashboard filtering panel! The way you structured the state transitions for the sidebar checkboxes made it incredibly straight forward to map out our backend API endpoints and tie them into Knockout.js. Always a pleasure working with you.
